

# Survey Summary

## Traffic Calming Concerns Survey | May-June, 2021

### Summary

The first traffic calming survey was used to help the City of West Fargo better understand the traffic calming issues on six (6) specific corridors within the city. The first survey took place between May and June of 2021. Over 200 residents took the survey. The results of the survey and the feedback from residents will ultimately provide the West Fargo Traffic Calming Study project team the insight to identify appropriate and effective solutions to traffic calming within the city.
